EDUCATION

Institute of Space and Technology

Bachelors in Computer Science

Islamabad

Sept. 2020 – July 2024

EXPERIENCE

Frontend Engineer

Design Bytes International

Sep. 2024 – June 2025

Gilgit

- Designed and developed responsive websites and web applications using React.js and Next.js, enhancing user engagement and satisfaction by 25%.
- Implemented front-end optimization strategies, reducing page load times by 40% and improving site performance.
- Built reusable and modular components, streamlining development workflows and reducing code redundancy by 30%.

Frontend Intern

Uconnect Technologies

June 2023 – Aug 2023

Gilgit

- Created interactive and mobile-friendly web pages using React.js and Tailwind CSS.
- Contributed to the design of an e-commerce platform, achieving a 30% increase in user conversion rates.
- Converted Figma designs into responsive, production-ready code, collaborating closely with UX designers to ensure seamless user experiences across devices.

PROJECTS

Passu Tourist Lodge | React, Tailwind, NodeJs, Express, MongoDB Atlas

[Live](#)

- Developed a professional hotel business website that enhanced online presence and brand visibility.
- Implemented a responsive design and intuitive user interface, increasing bookings by 18%.
- Integrated an AI-powered chatbot to streamline the reservation process and provide visitors with detailed information about local tourist attractions.

HunzaHaus | React, Tailwind, MySQL, NodeJs

[Live](#)

- Crafted an e-commerce platform showcasing traditional Hunza products including organic foods, dry fruits, and embroidery with secure user authentication and account management.
- Designed a responsive, user-friendly interface that effectively bridges traditional artisans with urban markets, increasing accessibility to authentic regional products.

AI Jobtracker | Next.js, Typescript NodeJs, Express, Prisma, Postgresql

[Github](#)

- Developed a job application tracking web app that stores both company and applicant-submitted details, featuring a dashboard with real-time analytics on application progress.
- AI-powered emotional wellness assistant to provide mood-based support and improve user experience during the job search process.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Javascript, Bootstrap, GSAP, TailwindCSS, ReactJs, Typescript, NextJs

Backend: NodeJs, ExpressJs, MongoDB, MySQL

State Management: ContextAPI, Redux Toolkit

Version Control: Git, Github

Testing: Cypress, Jest

Others: Agile methodologies, Web accessibility, Performance Optimization
